

ABSTRACT OF THE DISCLOSURE

0008 A flat and flexible 360 degree rubber contraption comprised of raised U-shaped trapping posts. There will be three rows of these posts that will completely surround the edge of a drain passage to cease the accumulation of hair and other debris from entering a drainage entry. The hair clogger stopper is placed around the circumference of a drain opening prior to the flow of waste water within a bathroom basin such as a sink, shower, or bathtub. This device is simple, safe, durable, easy to use, and will aid in eliminating the problem of having clogged drains.
